WSI Internet UK Franchises for Couples

My name is Tim Pellens and along with my wife Myra I operate a WSI office in Naarden, the Netherlands. As a WSI Internet Consultants we have built a successful business helping other firms profit from the Internet.

Before becoming a WSI Internet Consultant, I had a successful career in the management of Information and Communications Technology (ICT) companies which I found professionally rewarding. But, I was missing out on the growing years of my children. Moreover, my wife Myra, was ready to start something new but needed the freedom to spend time with the kids when necessary. This dilemma is not unusual for many of us working in the current economic landscape. We began to get excited about the idea of working for ourselves and started to investigate the option of becoming entrepreneurs.

Myra had experienced considerable success with a food franchise in the past, which she sold when our third daughter was on her way. So we were familiar with the franchise industry and were keen to identify one that would give us the opportunity to work together. When we stumbled upon a WSI Internet Franchise advertisement we were hooked. We both wanted to be in the dynamic Internet industry but since we do not have any programming skills, we did not know how to start. But, you don't need a technical background to be successful in WSI's world-class consulting environment. WSI's proven system is all you need. I'm pleased to say that after over 3 years as WSI Internet Consultants, the credibility and profitability of our business continues to be more satisfying than many of the business deals we achieved in our corporate careers.

When we started looking for a business opportunity, we were keenly aware that running our own business would come with its fair share of challenges but in hindsight, we know we made the right decision. We have been rewarded with the ability to work locally (no more long commutes), maintain our standard of living with an enhanced quality of life and of course, the occasional chance to stay in bed an extra half hour on a rainy day!

Tim Pellens – WSI Internet Consultant
