WSI Internet UK Franchises for Women

My name is Karen Sullivan-Correa, and I am a WSI Internet Business Consultant operating in Colombia and the United States.

In the 90s I founded and directed a non-profit organization for underprivileged communities that helped families displaced by war, wounded military personnel and children living with life-threatening diseases. Unfortunately the economic hardships of the late 90s adversely affected my ability to continue the work of the Foundation. I realized then that my best hope of resurrecting the Foundation and providing for my family was to utilize the power of modern technology and generate my own funding for travel and expenses as well as investment in projects such as rural Internet schooling.

After obtaining a Master's Degree in International Business I decided to build a business involving technology and the Internet that would reach a level of success that would enable me to fund the Foundation and get it back on track.

When I came across the WSI franchise business opportunity I was shocked at how well it met all of my personal, professional and social expectations. And, better yet, it was all wrapped up in a neatly organized, easy-to-understand business package that would help this previously non-technical person become an expert in Internet business solutions. It still surprises me how WSI is able to take an industry and products that are so hi-tech and present them in manageable bites that even I can understand. WSI truly does meet its vision to "simplify the internet". I experience many challenges and rewards as a WSI Consultant and am happy to say that WSI continues to surpass my expectations! I have access to first-class support from Home Office, cutting-edge technology, and a network that encourages innovation and sharing; everything I need to be a successful Consultant.

Karen Sullivan-Correa – WSI Internet Business Consultant
